-Average Stay Duration: 2.37	-Total Cancelled Bookings: 33.42K	-DURN: 1,026
-RevPAR: 7,347		

Property Performance: Atliq Exotica shows strong performance in revenue (320.31M) and bookings, with an average rating of 3.62. However, properties with lower average ratings, such as Atliq Seasons and Atliq Grands, may need attention to improve guest satisfaction.

Booking Platforms: Platforms like Others and MakeYourTrip contribute significantly to revenue, suggesting they are key drivers for bookings. In contrast, lower-performing platforms like Direct Offline may need improved marketing or partnership strategies.

Occupancy Trends: Occupancy is higher on weekends (62.64%) compared to weekdays (55.99%). While this trend is typical for leisure travel, there may be potential to increase weekday occupancy through targeted promotions or incentives for business travelers.

Room Classes: The Elite and Premium room classes dominate revenue, particularly in high-demand cities like Mumbai. This indicates a strong market for premium experiences, with opportunities to further market these room classes.

Customer Segments: The majority of revenue comes from the Business category (61.61%), highlighting a strong preference for business travelers. The Luxury category (38.39%) also contributes significantly, though there may be room for growth.

Room Type: Room Types RT2 and RT3 contribute significantly to revenue with 32.8% and 27.0% respectively . However, Room Type RT1 with 18.1% of revenue is the least preferred, warranting further investigation.

Booking Cancellations: All properties show a substantial number of cancellations, with Atliq Palace having the highest (5,949) followed by Atliq City (5,811). Atliq Seasons has the lowest cancellation rate (987), which might be linked to its overall lower bookings.

No-Show Bookings: Atliq Exotica and Atliq Blu also have the highest no-show bookings(1,171 and 1,155 respectively), which might have impacted the overall customer satisfaction and revenue.

Key Insights

Customer Retention: Atliq Exotica and Atliq Palace have the highest number of check-outs (16,557 and 16,532 respectively), indicating a strong customer retention despite the high cancellations.

City-Specific Insights: Delhi shows the highest occupancy on weekends (65.43%) and weekdays (58.62%), indicating strong demand. In contrast, Hyderabad and Bangalore have lower occupancy rates, especially on weekdays, presenting opportunities for targeted marketing or promotions to boost weekday stays.

Bookings Performance: Mumbai has the highest total number of bookings, approximately 43.46K, while Delhi has the lowest, approximately 24.23K. In terms of total bookings, Atliq Palace shows the best performance, followed by Atliq Exotica, while Atliq Seasons showed the weakest performance.

Booking Status: A large majority of bookings are checked out (70.15%), but a notable percentage are cancelled (24.83%), with a smaller portion being no-shows (5.02%). The high cancellation rate may point to issues with booking confidence or satisfaction, which could be addressed through better communication, flexible policies, or enhanced customer support.

Week-Wise Revenue Performance: Week 29 has the highest revenue (139.73M), followed by Weeks 24 and 27. However, Week 32 has the lowest revenue (21.01M).

Market Insights: Mumbai leads in revenue (688.64M) and has the highest RevPAR (8,907), indicating strong market performance. Bangalore follows with revenue (420.40M) and a RevPAR of 7,323. However, while Delhi shows the lowest revenue (294.50M), it maintains a relatively strong RevPAR of 7,359, comparable to Bangalore. This suggests that although overall revenue is lower, Delhi's market remains competitive in terms of price per available room. There is potential for revenue growth if occupancy rates are increased or if the market can attract a higher volume of bookings. The lower revenue could be due to fewer bookings or a smaller market size, but the consistent RevPAR points to opportunities for strategic improvements in marketing, pricing, or customer base expansion.

Revenue Realization: The Logtrip and Journey platforms show high realization percentages (70.59% and 70.52%, respectively), indicating effective revenue capture. Direct Offline bookings have a higher ADR (12,791.17) but a lower realization percentage (70.20%), suggesting potential opportunities to improve direct booking efficiency. Meanwhile, MakeYourTrip and Tripster show lower realization percentages (69.99% and 69.83%), which may require optimization in pricing or booking processes.
